

NumberSense Workbooks

The **NumberSense Workbook Series** has been developed to provide independent written activities for children. The series can be used by teachers working with small groups of children at a time to keep the other children productively engaged as well as in whole class settings. The workbooks allow for differentiated support with different children in a class working in different workbooks and hence on different activities that are well matched to their developmental state. The series can also be used by parents wanting to provide daily support to their children.

The richly illustrated pages are engaging, challenging and developmental in nature. To see sample pages and to help you decide which workbook is the best one to start with for the unique needs of your child/class visit: www.numbersense.co.za today!

There are 26 workbooks in the series:

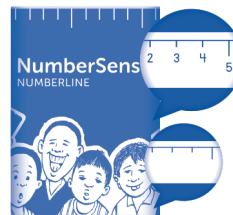

- 2 NumberSense Workbooks for Grade R
- 12 NumberSense Workbooks for the Foundation Phase
- 12 NumberSense Workbooks for the Intermediate/Senior Phase
- Typically 1 workbook per term.
- 48 pages per workbook: one page-per-day.
- Foundation Phase workbooks available in all official languages
- Intermediate/Senior Phase workbooks available in English and Afrikaans
- The workbooks are available for use with certain tablets. Please contact info@brombacher.co.za for technical details and pricing information.

NumberSense Projection CD

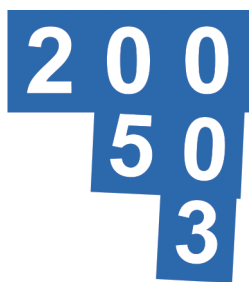

As an exciting value-add to the NumberSense Workbook Series product range we make available to schools using the NumberSense Workbooks a projection CD with the NumberSense Workbooks. The CD has copies of the workbooks that a school has ordered in a format that will allow teachers to project the workbooks onto a screen using a computer and data projector or smart-board. This format enables the projection of the page or exercise that the class is busy with.

NumberSense Number Line

A durable doubled sided number line from 0-120. One side has numbers while the other side is graduated only. An important tool to support children develop their mental number line. It is possible to write on and wipe off the number line using non-permanent marking pens.

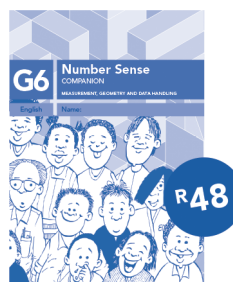

NumberSense Flard Cards

Flard cards allow children to build up numbers from and break down numbers into their constituent thousand, hundred, ten and unit elements. Sets of 36 cards (1 - 9, 10 - 90, 100 - 900, & 1000 - 9000) made from sturdy cardboard are available in six different colours.

For more information on Flard cards and activities involving Flard cards visit www.brombacher.co.za

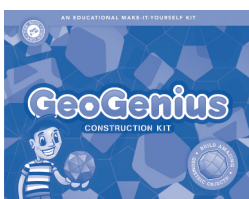

NumberSense Companion

Grade 4, Grade 5 and Grade 6 Measurement, Geometry and Data Handling Workbooks. Grade 7 to be released soon! Four activity based workbooks in the spirit of the NumberSense Workbooks that address Measurement, Geometry and Data Handling for the Intermediate Phase and Grade 7. These 64 page workbooks complement and complete the NumberSense curriculum offering for the Intermediate Phase.

SPECIAL INTRODUCTORY OFFER!

GeoGenius Construction Kit

The GeoGenius Construction Kit is a fun-filled teaching and learning aid for the study of three dimensional (3D) geometry, developing geometric thinking and understanding through play. Using bright, precision manufactured, sturdy cardboard shapes and elastic bands supplied in the GeoGenius Construction Kit, it is possible to assemble an enormously wide range of objects, in a fun way, quickly and easily.

GeoGenius Visualisation Kit

The GeoGenius Visualisation Kit is a fun-filled teaching and learning aid to develop confidence in seeing objects from different positions (points of view). In the visualisation activities of this kit four players work together to construct a 3D arrangement of blocks where each player only has information about one view of the arrangement. Extra card sets for download - to be released shortly.
